Deceased Estates Program Version 12.4d Enhancements

Made provision for the carrying forward of a shortfall from one account to the other in the case of **multiple** L&D accounts. In order to achieve the desired result:

1. Generate the account without completing a carried forward shortfall in order to determine how much (or all) of the shortfall you want to carry forward;
2. Take note of the amount;
3. Enter the shortfall to be carried forward to the next account with a leading minus sign to indicate that you are carrying a negative amount forward:

Cash or shortfall to be carried forward to NEXT L&D account

The program will do the rest.

THE END
