

LegalEase

Deceased Estates Program Version 12.4f Enhancements

Cash recon:

Fixed problem where certain cashbook items were not reflected as having been paid / collected in the Cash Recon screen. That is, the green ticks on the Cash Recon screen kept reappearing even though the cash recon related allocations on cashbook entries were correctly done.

Irregular advances now print correctly at the end of the Cash Recon.

Logging:

For support and trouble-shooting purposes a /log switch was made available to enable database logging.

Auto saving of estates:

You can now disable the auto saving of estates by adding the /noautosave to the end of your target of your LegalEase shortcut. Alternatively add Autosave=0 to the [LegalEase] section of admin.ini.

Purging of dated auto save files:

Auto save files (Autosave*.lee) are deleted after 180 days and backup files are deleted after 90 days. To disable this automatic purging you can add /nopurge to the end of the target in your LegalEase shortcut or add Purge=0 to the [LegalEase] section of admin.ini.

On certain network environments the purging was causing LegalEase to freeze on startup.

THE END
